

Task 2 – Customer Retention & Churn Analysis

Sample synthetic dataset for a subscription-based business. The data is designed for Excel / Python / Power BI practice and is not real customer data.

Dataset size: 120 customers | Churn rate: 30.0% | Average LTV: █9,464 | Monthly revenue: █93,180

Suggested Dashboard KPIs & Analysis

Use the following measures in Power BI or Excel: total customers, active customers, churned customers, churn rate, monthly recurring revenue, average satisfaction, average lifetime value, churn by plan, churn by reason, retention by tenure, and engagement vs. lifetime value.

Important: This is a synthetic practice dataset created specifically for completing Task 2. It can be replaced later with an actual company dataset.
